

Ed Veckie

Hello, I'm Ed Veckie, VP of Unified Engineering, and I'm excited to announce my candidacy for the Board of Directors of the Organization of Canadian Nuclear Industries. With over 20 years in the nuclear sector, I've had the privilege of collaborating with exceptional professionals and organizations. My experience as a board member of the Canadian Nuclear Association has sharpened my leadership skills and provided valuable insights that I'm eager to contribute to the board. I believe our industry thrives on collaboration, connection, and mutual support. At Unified Engineering, I see firsthand the unique challenges and opportunities faced by our supply chain, particularly among smaller organizations. I understand the distinct needs of all companies, regardless of size, and I recognize the common goals that unite us in advancing our industry. As a board member, my vision is to prioritize the interests of all suppliers—big and small. A healthy, resilient supply chain is essential for the strength of our industry, and I will work diligently to foster alignment that benefits every tier. Additionally, collaborating with the Canadian Nuclear Association, the Canadian Nuclear Society, and other organizations will accelerate our growth, because we know we cannot do it alone! I would be honored to represent you, and I greatly appreciate your support as we strive for a stronger, more unified nuclear industry together. Thank you!

Ed Veckie is the Vice President and CEO of Unified Engineering, with over 20 years of experience in engineering, project management, and business leadership. He drives long-term growth strategies, oversees R&D projects, and fosters partnerships with clients and academic institutions. Ed's governance experience as a former Canadian Nuclear Industry board member where he has collaborated with his peer board members in guiding strategic initiatives in public and government relations as they relate to the long-term needs within the nuclear industry.
