

Lisa McBride

I have worked in the nuclear energy industry for many years. I am a strong advocate for the role nuclear can and will play in our netzero goals domestically and internationally. I have been an active board member for 1 term at OCNI. As a member of the board, I have been active in supporting the role of the association and the critical role of the Canadian Nuclear Supply Chain. I would be thrilled at the opportunity to serve a second term and continue to support the journey we are on together.

Lisa is the Vice President, Country Leader, GE Hitachi's SMR Canada business. In her role, Lisa is responsible for the vision & strategy to lead the deployment and implementation of the BWRX-300 Small Modular Reactor in Canada. She leads the collaboration with customers, Canadian government, industry, and partners and provides leadership and oversight of the GEH SMR Canada business operations. Lisa has over 22 years' experience in the nuclear industry, starting her career with Ontario Power Generation. Her drive and commitment have propelled her into several key leadership roles in both nuclear and corporate functions. Lisa's diverse experiences have positioned her to engage in several critical initiatives, where her experience across the business has resulted in her leadership of several multi-disciplinary teams. Lisa holds a Master of Arts Degree in Leadership from the University of Guelph. Lisa McBride is the current President of Women in Nuclear (WiN) Canada. In this role, Lisa provides vision, strategic direction, and oversight of the day-to-day operations of the organization, which hosts more than 6,000 members in 7 regions across Canada. Lisa currently serves on boards for a number of organizations including, the Organization of Canadian Nuclear Industries (OCNI), the Canadian Nuclear Association (CNA), Ontario Tech University's Board of Governors and the WiN Global Executive Board.
