

## Louie Shoukas

Louie has actively served on the OCNI Board and various sub-committees for the past three years, contributing with enthusiasm and dedication. During this time, Louie has played a key role in shaping and implementing the strategic plan alongside the Board and management team. Currently, Louie is engaged in the CEO search process, leveraging over 30 years of experience in the CANDU nuclear industry and previous board experience with Markham District Energy. With extensive board experience and leadership qualities, Louie is committed to helping the OCNI Board navigate the CEO transition and drive further improvements in membership value at all Tier levels. His strong relationships with OCNI members position him as an excellent conduit for connecting members to OCNI's objectives and supporting their business development initiatives. Louie brings a wealth of expertise in corporate governance, legal and fiduciary responsibilities, resource and financial management, as well as a deep understanding of the Canadian nuclear supply chain and the perspectives of utility owners. His experience, enthusiasm, and commitment to continuity will be a valuable asset to the OCNI Board of Directors.

Louie is a dynamic, results-driven executive with over 30 years of experience in the Canadian nuclear energy industry. Known for his strong leadership and communication skills, Louie has a proven track record of driving large-scale business improvement initiatives that enhance organizational effectiveness and operational efficiency. He looks forward to continuing to support OCNI and the nuclear industry in its growth activities. Over the past few years, Louie has deepened his involvement with OCNI by participating in numerous Supplier Days, OCNI-sponsored events, and collaborating with peers and industry leaders to share insights and knowledge. As a current OCNI Board Member, Louie has actively contributed to the development and execution of the strategic plan. He is especially focused on expanding OCNI's reach to a supplier network across Canada and increasing value for members at all tiers. Louie's career began after completing a Mechanical Engineering degree from the University of Toronto, when he joined Ontario Power Generation (OPG) to support the Darlington Nuclear Generating Station. Following his MBA from the University of Toronto, he advanced into leadership roles within OPG, spanning technical, operational, and financial organizations. Among his notable achievements, Louie successfully led OPG's Nuclear Business Transformation team, driving a major reorganization, unifying Pickering Nuclear under a single management team, and overseeing multiple WANO evaluations. He also played a key role in interfacing with the CNSC on various projects and licensing activities. After 22 years with OPG, Louie joined PCL Construction as their Chief Nuclear Officer, tasked with developing a nuclear division. Under his leadership, PCL successfully implemented key quality programs and secured its first contract a year ahead of schedule. PCL Nuclear has since been selected as the constructor and reactor vessel fabricator for the USNC and Global First Power project at CNL's Chalk River site. With Canada's largest module fabrication facility and an experienced field construction team, PCL is poised to support the implementation of Small Modular Reactors (SMRs) across Canada. Beyond his professional commitments, Louie served on the Markham District Energy (MDE) Board of Directors for 14 years, contributing to its growth. His roles included Vice Chair of the main Board, member of the Human Resources Sub-Committee, and Chairman of the Finance Sub-Committee.
