

## **Samuel Anselm**

Canada stands at the forefront of nuclear innovation, with a rich history that positions us as global leaders in our current energy transition. Our diverse industry spans regulatory, R&D, utility, and supply chain sectors, all crucial for continued growth and sustainability. With my extensive experience in the nuclear supply chain, evidenced through my involvement in the supply of materials, equipment, and EPC services, I understand its vital role in our future. Together, we can advocate for new nuclear development, enhance existing facilities, and support Indigenous reconciliation while fostering a talented workforce. As a proven

collaborator, I am seeking a position on the OCNI Board of Directors, and I invite you to join me in shaping a sustainable future for our industry. Together, we can lead the way in nuclear energy and make a lasting impact on our planet. Let's work together to empower Canada's nuclear future.

Samuel Anselm is a Project Director specializing in Nuclear Maintenance, with over 25 years of experience in the nuclear, industrial, and manufacturing sectors. Holding a Bachelor of Applied Science in Mechanical Engineering from the University of Toronto, Samuel excels at leadership and strategic planning. Currently, he leads nuclear maintenance operations at Aecon, overseeing portfolios for clients like Ontario Power Generation, Bruce Power, and Canadian Nuclear Laboratories. Samuel's notable achievements include revitalizing and strengthening business units, significantly increasing revenue, and improving safety and performance metrics. His expertise extends to project and contract management, new business development, and vendor oversight. Samuel is recognized for his ability to build strong relationships with clients and stakeholders, and is deeply committed to safety and excellence in all projects, ensuring high standards in every aspect of his work.
