

Vinod Chugh

As a candidate for the OCNI Board of Directors, my focus will be on advancing clean energy systems, decarbonization, and innovation within the nuclear industry. With over 34 years of experience in energy transition, nuclear technologies, and business development, I have a proven track record of driving successful projects and navigating complex regulatory environments. I aim to bring this expertise to the Board to help shape strategic initiatives that strengthen the OCNI's role in promoting its members' interests. I am committed to fostering collaboration between the Board, industry leaders, and stakeholders, ensuring that OCNI remains at the forefront of industry innovation. My leadership experience, combined with a strong understanding of governance and strategic planning, will enable me to contribute meaningfully to the Board's decision-making and growth strategies. By focusing on sustainability, innovation, and industry best practices, I hope to help guide OCNI through the evolving landscape of nuclear energy and infrastructure.

Vinod Chugh, P. Eng., is an accomplished engineer with over 34 years of experience in the energy sector, focusing on nuclear energy, decarbonization strategies, and clean technologies. He is the Founder and President of Power Generation Integrated, where he provides consulting services on advanced nuclear technologies, clean energy systems, and energy transition. His expertise spans R&D, engineering design, procurement, licensing, and lifecycle management. Vinod has led multi-million-dollar projects, including the life extension of the Darlington Nuclear Station, and has evaluated cutting-edge technologies in nuclear fusion, geothermal, and renewable energy. He is a member of several prestigious organizations, including the OCNI, Canadian Nuclear Society and the ASME Committees. His contributions also include mentoring the next generation of engineers and driving innovation in clean energy systems.
